Day 8 – Admin Panel MVP

Me (done)

- Define admin panel MVP: filters by track + status, view submission details, enter scores.
- Document scoring criteria and data model for `scores`.

Santhosh (complete before 18:00 and merge to main)

- Implement `scores` table and admin API endpoints:
  - List submissions with filters.
  - Save/update scores per judge/submission.

Debojeet (start after Santosh is done and branch is merged)

- Build `/admin` view:
  - List of teams/submissions.
  - Filter UI (track, status).
  - Link to individual submission detail page.

Smriti

- Unresponsive

Vinith

- Completeness:
  - Share your github (I'll invite you to repo).
  - Filter UI (track, status) go to `/docs` folder and make sure all tasks are completed till day 7.
  - Help Santosh and Debojeet, and make sure no merge conflicts.
  - Validate admin flow against judging process (how judges will actually use it).

Harshita

- Check for Smriti

Nikhil

- Async: review admin panel MVP when screenshots/links are ready, Vinith will share.
