## Day 5 – Payments Flow to PAID

### ME (done)

- Review Razorpay integration skeleton; ensure `payment_status` FSM (`INITIATED`, `SUCCESS`, `FAILED`) is clear in docs.
- Define front-end states: pending, success, failed.

### Santhosh (done)

- Implement Razorpay test integration:
  - Order creation endpoint.
  - Webhook endpoint updating `payments` + team status to `PAID`.
- Ensure idempotent handling of webhooks.

### Debojeet

- Add “Pay registration fee” section in dashboard.
- Integrate Razorpay checkout with test keys and show basic status message on return.

### Smriti

- Design payment section states: not paid, in progress, paid (with clear messaging).

### Harshita

- Confirm payment flow matches ops needs (who pays? per team/person? messaging).
- Flag any copy changes needed for clarity.
- Check progress on everyone at 17:00

### Nikhil

- Share the Razorpay Keys
- Find Santosh’s replacement
