Day 6 – Submission Model & Resources

ME (done)

- Define submission schema & statuses (MVP): fields + deadline, `submitted_at`.
- Document submission rules and deadline behavior in `/docs`.

Shivam (done by me for today, just pull the code and check that your tasks are completed)

- Implement `submissions` table and basic rules:
  - One submission per team.
  - Enforce deadline check in backend.
- Implement backend endpoint for creating/updating a submission pre- deadline.
- Share me your Github, So I can invite you in repo
- Also, check the docs and make sure all the tasks are completed till day 6

Debojeet (completed by me, both yesterdays and today's – you should fix all the minor issues till day 6)

- Create `/dashboard/submit` page structure:
  - Fields: title, description, track, repo, demo, file upload placeholder.
- Add resources/statements page route.

Smriti (no response from 48 hours, today is day 3 without any activity, if you are available today design the UI and convert that in code)

- Design submission page in Figma (form layout, success messages, error states).

Harshita

- Start drafting content for:
  - Tracks list
  - Prizes
  - FAQs / rules
- Share with Debojeet for later integration.

Nikhil

- Async: approve submission fields and confirm what's mandatory.
